

Product Update

Release log

Update/Feature	Description
FEATURE IMPROVEMENT Dashboard >> New UI and new menu options	<p>The Dashboard module in the Contify platform now also supports donut charts and has improvements in column charts.</p> <p>Users can now also choose the legend position. The overall widget UI is updated to be compatible with 1x1 grid size as well.</p>
FEATURE IMPROVEMENT Newsfeed >> Add Insight >> Display name of the user in Newsfeed widgets	<p>When Primary Intel is added, the user name is now also displayed in the Newsfeed widget on Contify platform Dashboards. This is an extension of the feature where the user name is displayed on Newsfeeds and Newsletters.</p>
FEATURE IMPROVEMENT Newsfeed >> 'Comments available for all users	<p>The 'Comment' feature on each news card is now an out-of-the-box offering. It will be available for all users of the Contify platform.</p>
FEATURE IMPROVEMENT Saved Searches Page >> Show the number of times a saved search is used	<p>The Saved Searches page has a new column introduced - 'Widget Count'.</p> <p>This indicates how many times a certain saved search is used in widgets across all Dashboards of the Contify platform - This will make it easier to delete unnecessary saved searches from the platform.</p>

<p>NEW FEATURE</p> <p>Newsfeed >> Text formatting options in news card</p>	<p>Users can now format the news update ‘Summary’ text field while editing each news card. The changes made on the news card will be reflected when the contents are added to newsletters or shared via email as alerts.</p>
<p>FEATURE IMPROVEMENT</p> <p>Embedded Newsfeed widget >></p> <ul style="list-style-type: none"> Redirection Updated 	<p>Clicking on an update in the embedded newsfeed widget of the Contify platform will no longer redirect users to the Contify platform. Users will be redirected to the original source of the article.</p>
<p>FEATURE IMPROVEMENT</p> <p>Dashboard sharing notification</p>	<p>When sharing dashboards with others, users will now have the option to notify others via email.</p>
<p>FEATURE IMPROVEMENT</p> <p>UI updates</p>	<ol style="list-style-type: none"> 1. Dashboards: ‘Access Control’ is renamed to ‘Share’ 2. Newsfeed: ‘Top New’ is renamed to ‘Key Updates’ 3. Newsfeed: ‘Add Insight’ is renamed to ‘Add Update’ 4. Smart filters date picker: ‘All Updates’ are renamed to ‘All Dates’ 5. Smart filters ‘exclude’ button: New icon color and new tooltip
<p>NEW FEATURE</p> <p>Newsletters >> Rating System</p>	<p>Before sending a Newsletter from the Contify platform, analysts will have the option to enable Newsletter Rating. The rating is based on a 5-point scale, and newsletter recipients have the option to provide their rating. The provided rating will be captured back in the system.</p>
<p>NEW FEATURE</p> <p>Dashboards >> Copy an existing widget</p>	<p>Users can now copy an existing widget in the same workspace or any other existing workspace. The original widget's underlying data, size, and formatting will be retained.</p>

NEW FEATURE Dashboards >> Download underlying data	For Dataset type widgets - Users can now download the existing data behind the chart in a spreadsheet. This enables faster editing of dataset-type charts, without looking for the base file stored somewhere locally.
FEATURE IMPROVEMENT Newsfeed >> 'Add Update' UI update and persistent icons	Space optimization in the 'Add update' slider, to reduce the scroll and improve the user experience while adding updates to the Contify platform. Icon update for the 'back to top' and chat icons.
FEATURE IMPROVEMENT Admin >> Company Preference >> Addition of 'Polish' language in the language accessible bucket	Inclusion of Polish language as one more non-English language.
FEATURE IMPROVEMENT Help video links on the Contify platform	The help video links available on the following pages have been updated with the latest link: <ol style="list-style-type: none">1. Taxonomy builder2. Sourcing manager3. Newsletter manager4. User management
FEATURE IMPROVEMENT Newsfeed >> 'Hide source' renamed to 'Exclude source'	'Hide source' option in the news card overflow menu is renamed to 'Exclude source' for more clarity. A new validation flow is also added to avoid accidental exclusion of any source.
NEW FEATURE Dashboard >> Show 'shared by' username for shared dashboards	For shared dashboards, users will now be able to see who has shared the dashboard with them.
