Product Update

Release log

Update / Feature	Description
NEW FEATURE: Single-Sign-On (SSO)	<p>The Contify platform now supports SSO. This feature allows users to log in to the Contify platform using their existing enterprise credentials (Email ID and Password set up by users in their own organization). A few key points to note -</p> <ul style="list-style-type: none">• Contify platform ‘Login’ screen has a new look and feel• There is no change in how users currently log in to our platform. Users can continue using their existing Contify platform credentials to log in• SSO is not enabled for any client by default. In case a client wants to leverage SSO, Contify will need to have a discussion with the client's IT team first, before setting up the SSO to work for them
FEATURE IMPROVEMENT: Newsfeed >> Grouping of Social Posts as duplicates	<p>Social posts (LinkedIn, Twitter) will now be marked as duplicates of the original articles that are shared in them. This is to reduce redundant content in the Newsfeed.</p> <p>For example, if a WSJ article is available in the system, and the same article is posted as a link on a LinkedIn post - The LinkedIn post will be marked as a duplicate of the original WSJ article.</p> <p>The LinkedIn article can still be viewed by selecting the ‘Show’ option in the Duplicates dropdown of the Newsfeed</p>
FEATURE IMPROVEMENT: Dashboard >> Workspaces >> Set as Home	<p>Users can now personalize their Contify platform homepage by setting any workspace as their home page</p>
NEW FEATURE: Dashboard >> Workspaces >> Access Control	<p>The creator of a workspace can now share the workspace with other users on the platform. The access is of two types -</p> <ul style="list-style-type: none">• View - Users with ‘view’ access to a workspace can ONLY view the workspace. They cannot modify the widget size and placement. They also cannot edit any widget (name, saved search used, etc.)• Edit - Users with ‘edit’ access to a workspace have full rights of editing the workspace.

Update / Feature	Description
FEATURE IMPROVEMENT: Taxonomy Builder >> Map with multiple pre-configured tags	Users can now map one custom tag with multiple pre-configured tags in the Taxonomy Builder. With this change, all future stories that are associated with the pre-configured tags will also be available in the system for the mapped custom tag
NEW FEATURE: Global Newsfeed >> Saved Search >> Curation Options	While creating a Global Saved Search, users will now have the curation option as follows - ‘Auto-publish’ or ‘Manual review’
FEATURE IMPROVEMENT: Add Insight >> Upload PDF >> Run Auto tag	<p>The ‘run auto tag’ feature is now available for any PDF files uploaded via Add Insight. Few things to note -</p> <ul style="list-style-type: none">• The auto-tagging runs via our pipeline. Hence, NER will also run to identify tags - Which means that analysts do not have to explicitly write tagging rules for their clients• The system identifies the tags by parsing through the first 5000 words in the uploaded PDF• In case a ‘summary’ is also provided while uploading the PDF, the summary text is also considered to identify tags (The mandatory Title field is also considered to identify tags)
FEATURE IMPROVEMENT: Newsletter Manager >> Edit Mode	Now users can upload an image directly from their machines in the NL intro and article body fields
FEATURE IMPROVEMENT: Curated Newsfeed UI improvement	<p>The Newsfeed UI is updated to highlight ‘Top News’ and ‘Primary Intel’. The name ‘Field Intelligence’ has also been updated to ‘Primary Intel’</p> <p>Further, the sorting options by relevance, date published; how duplicates are displayed, and visibility of tags are now available in a collapsed menu</p>

Release log

Update / Feature	Description
FEATURE IMPROVEMENT: Curated Newsfeed >> Directly share a story	<p>The news card menu now has an option to directly share the story. This is done with the intention to improve user experience while sharing an article with others.</p> <p>The feature works just like ‘share via email’</p>
FEATURE IMPROVEMENT: Changes in how PDFs are processed	<ul style="list-style-type: none">• The sourcing engine will now also fetch the PDF titles for the PDFs (based on availability)• All PDF articles which do not have the title and have the content “The article is in a PDF Format. Please click to read” will be moved to another status - Incomplete Fetch
NEW FEATURE: Global Newsfeed available to all users	<p>Global Newsfeed is now available to all Contify platform users by default - Users have unrestricted access to all of Contify’s content. Users can view the content and can also apply filters and search to refine the results</p>
FEATURE IMPROVEMENT: New and improved Sourcing Manager	<p>The Sourcing Manager in the Contify platform is improved. New things that can be done using the new features are -</p> <ul style="list-style-type: none">• Option to add a source RSS via the search bar• Option to exclude/hide specific sources• Option to set up account-level reject rules• UI/UX improvements
FEATURE IMPROVEMENT: Newsletter Manager >> My Subscribers	<p>The ‘Import Subscribers’ utility in the Contify platform now allows adding one subscriber to multiple ‘Lists’ at once</p>
FEATURE IMPROVEMENT: User Analytics >> Newsletter and News Items tabs	<p>The Newsletter and News Items tabs now also display the usage analytics on the platform</p>
